Class 13 (Week 6, R): Inner workings of the grammar IV, MaxEnt grammars

Just the administrative stuff for today. Otherwise, we're working on last time's handout, and we're discussing Moore-Cantwell & Pater.

To do

☐ Read **Jarosz (submitted)** for Thursday (Nov. 12)

_____ will present the paper's proposal as it applies to hidden structure like feet

_____ will present the paper's proposal as it applies to underlying representations and offer comparisons to other approaches we've seen in class (such as Robust Interpretive Parsing)

☐ **Homework #3**, a computing exercise on MaxEnt, is due Thursday (Nov. 12)
☐ Are you making progress on your **project?**

Next week: Learning models for variable and non-variable grammars.
