

How to Print from a USB flash Drive

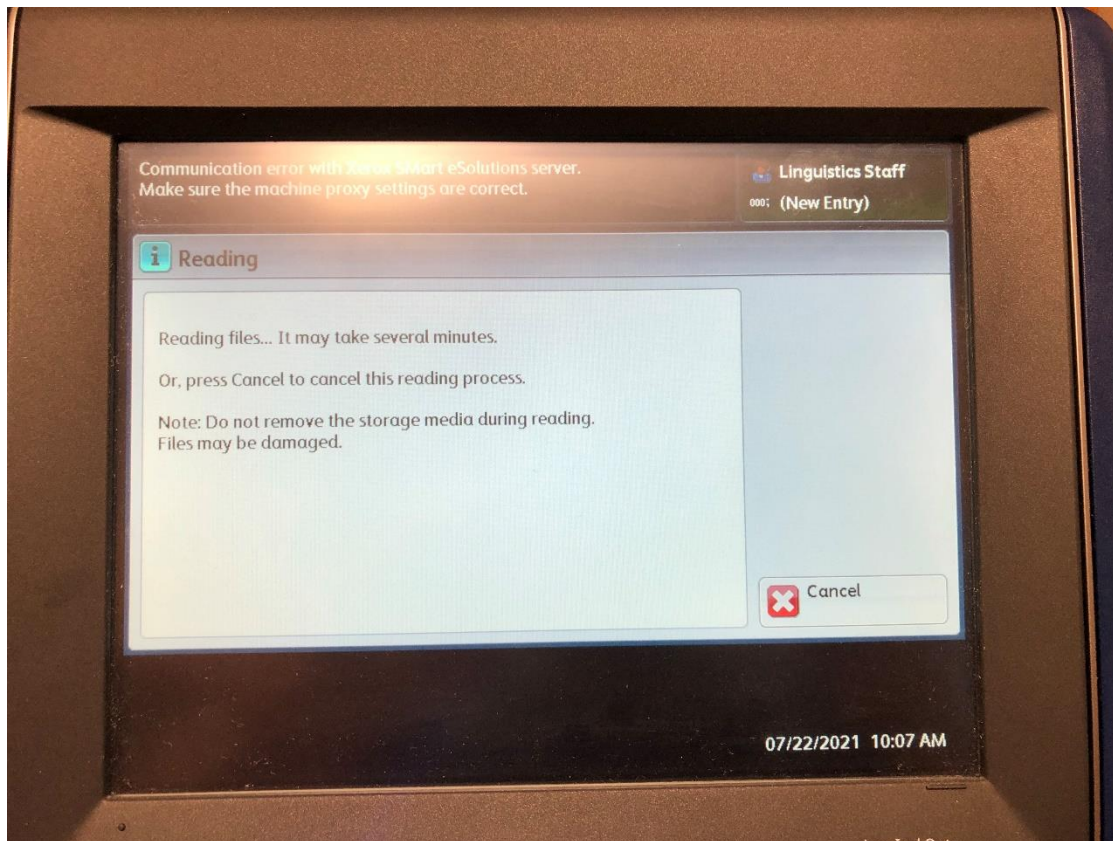

Insert Flash Drive into the Machine

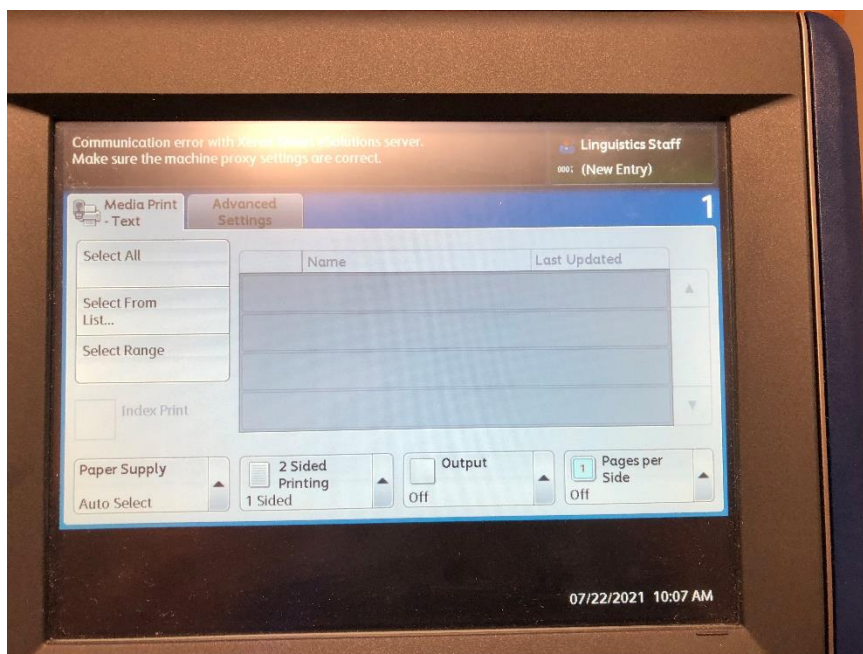

Next press the home button on screen and Select Media Print -Text

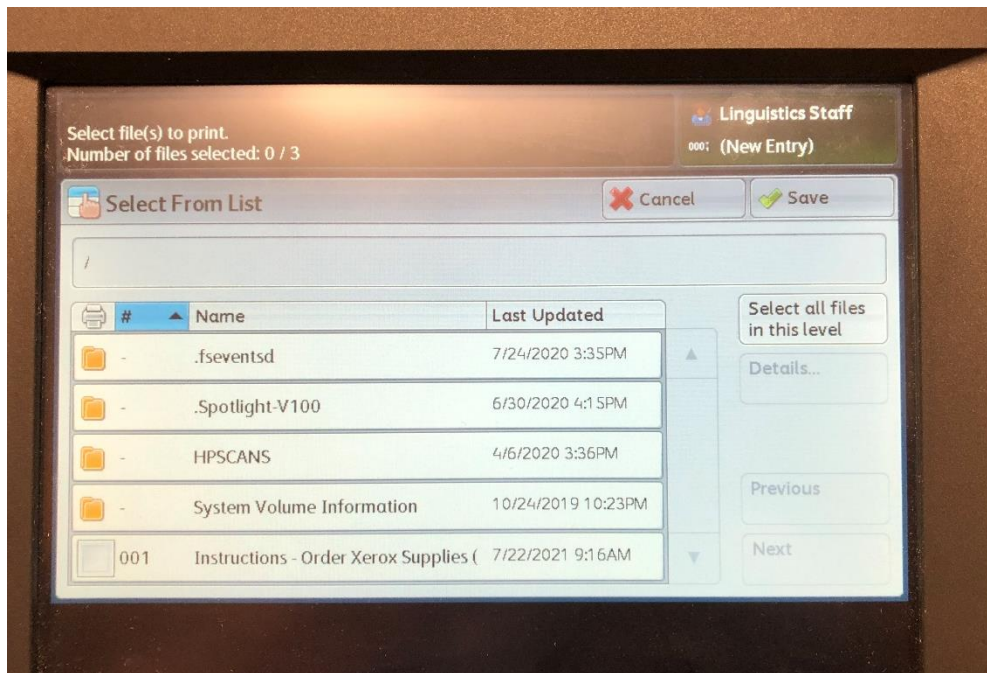

The machine will start reading your flash drive. You may see a screen that says reading files. Depending on how many files you have this can take a while.

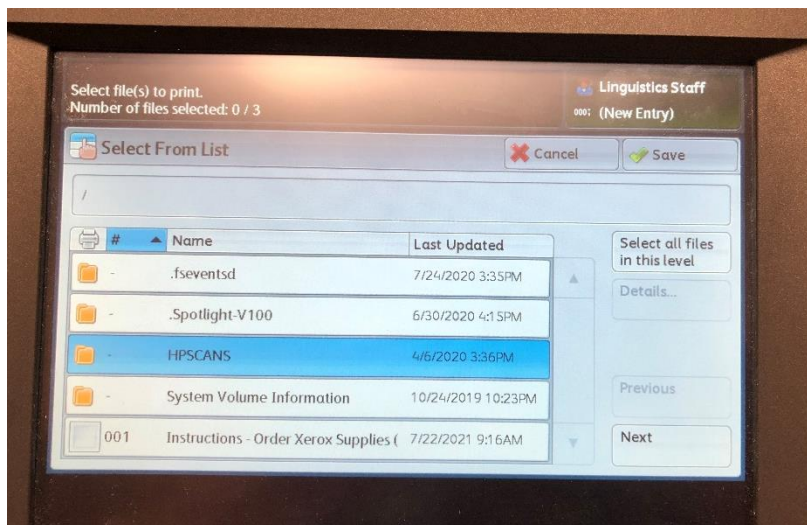

Once Prompted with this screen. Select **(Select from List)**

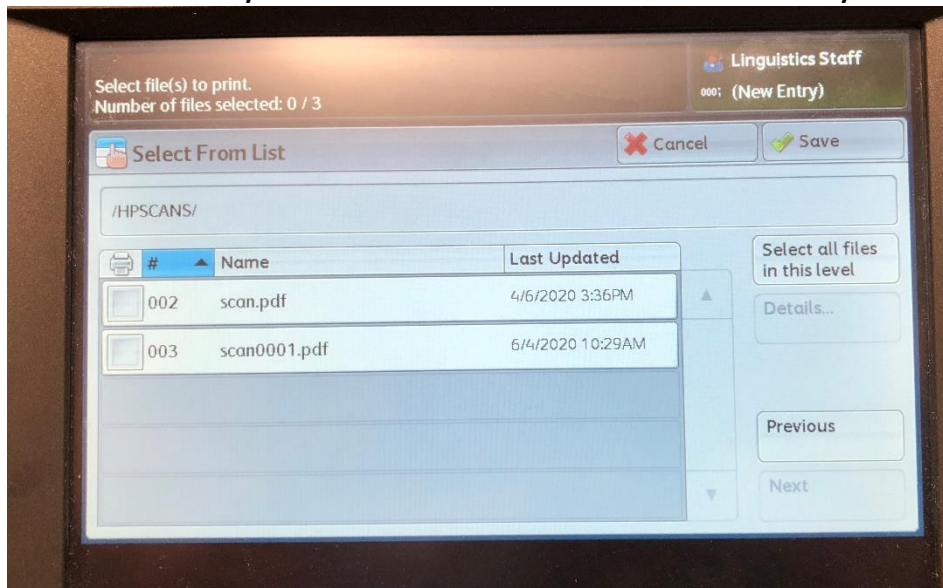

This will bring up files and folders on your flash drive

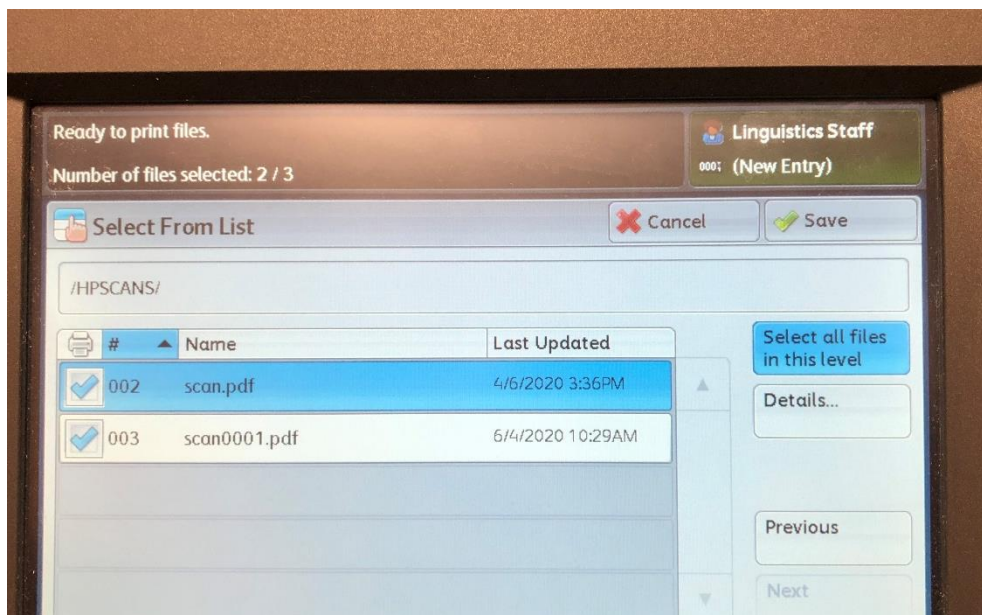

From here select the folder you want and click next. In this case its HP scans.

This will take you inside the selected folder and you can view its files.

Select the files you would like to print then click save at the top right.

Now you should be able to press the print button to print documents that were selected.
